## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because they are not including the reference numbers that represent the part or structure or device. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: no reference numbers indicating the part of the applicant invention. Appropriate correction is required.

***Claim Objections***

3. Claims 1-8 are objected to because of the following informalities: because there is no reference numbers referring to the claiming elements it cannot be understood that what is the first, second, third or fourth device the applicant is claiming. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-8 are rejected under 35 U.S.C. 102(a) as being anticipated by Hendrikx EP 1 060 662. Hendrikx discloses the invention as claimed comprising a first device, a second device, a third device and a fourth device as recited in claim 1 as shown in figures 1-4 for piercing the ear and storing the tissue material removed from the ear during piercing.

Regarding claim 2, Hendrikx discloses the cutting head 5 and the cap 15 having depressions for receiving a sample of tissue material 10. Note figure 4.

Regarding claim 3, Hendrikx discloses the pin 2 as shown in figures 1-3.

Regarding claim 4, note figures 1-4.

Regarding claims 5-8, the Hendrikx device is inherently capable of performing the recited method steps.
